4. Nitsa Mehndiratta

OVERVIEW

A web application that connects verified househelpers with possible employers and vice versa. This helps the house helpers to find work on a reasonable salary. Form partnership with NGOs to hire and employ these workers at a reasonable rate. Collaborate with local Police to verify each person.

Objectives

Helps in connecting house helpers with their possible employers and the employers with verified house helpers. Collaborate with local police and ngos for a safer transaction between both parties.

Product features

Employers

1. Search available house helpers
2. Easy invite

House Help

1. Profile creation
2. Accept invites

Admin

1. Manage and verify house helpers profiles
2. Manage transactions

Technology used

Frontend

1. HTML hyper text transfer
